

FreshPath

CONSULTING

Helping You Define and Implement Your Software Roadmap

FreshPath Consulting Provides Comcast Spotlight with an Agile Data Mart Implementation

Comcast required a fast integration turnaround for our data mart/business intelligence dashboard.

FreshPath Consulting managed the transition in an extremely tight timeline and had us online with our new financial data seamlessly.

- Tricia Keeley – Director of Operations

The Challenge

Comcast Spotlight was transitioning its billing system, the primary source for its Sales data mart.

When internal resources were no longer available close to the implementation date, FreshPath Consulting was brought in to

- Retire the legacy source system
- Integrate the new Traffic and Billing system into the data warehouse
- Validate data in accordance with Sarbanes-Oxley
- Accomplish this seamlessly within a 1 month time frame

The Solution

FreshPath Consulting provided the following:

- Full reverse engineering of the existing system
- Detailed documentation of the existing data flow
- Worked with new Traffic & Billing system vendor to map source fields for required data warehouse data.
- Designed, tested and validated new ETL components and process
- Designed, tested and validated new BI components and process
- Designed, tested and validated updated portal components and process
- Identified process improvement opportunities
- Risk identification, analysis, and response planning

The Benefits

- All deliverables were provided on time with high quality results
- Thorough documentation to support business continuity
- Functionality was transitioned seamlessly

FreshPath Consulting provided solid technical know how and support to our internal IS resources, allowing us to manage the system after Andrew transitioned out of Comcast.
